

SITE

Asrwa neighbourhood is 'Panchayat led' small village and become part of Ahmedabad city due to city expansion. Several manufacturing and weaving industries are situated in this area. Localities comprises of mixed neighborhood of people who either migrated from nearby villages to natives who dwelled here since city was established. For both types of dwellers - crucial part of their living is the social connect and community bond they share with neighbours and surrounding communities.

DESIGN CONCEPT

Type A

Type B

Type C

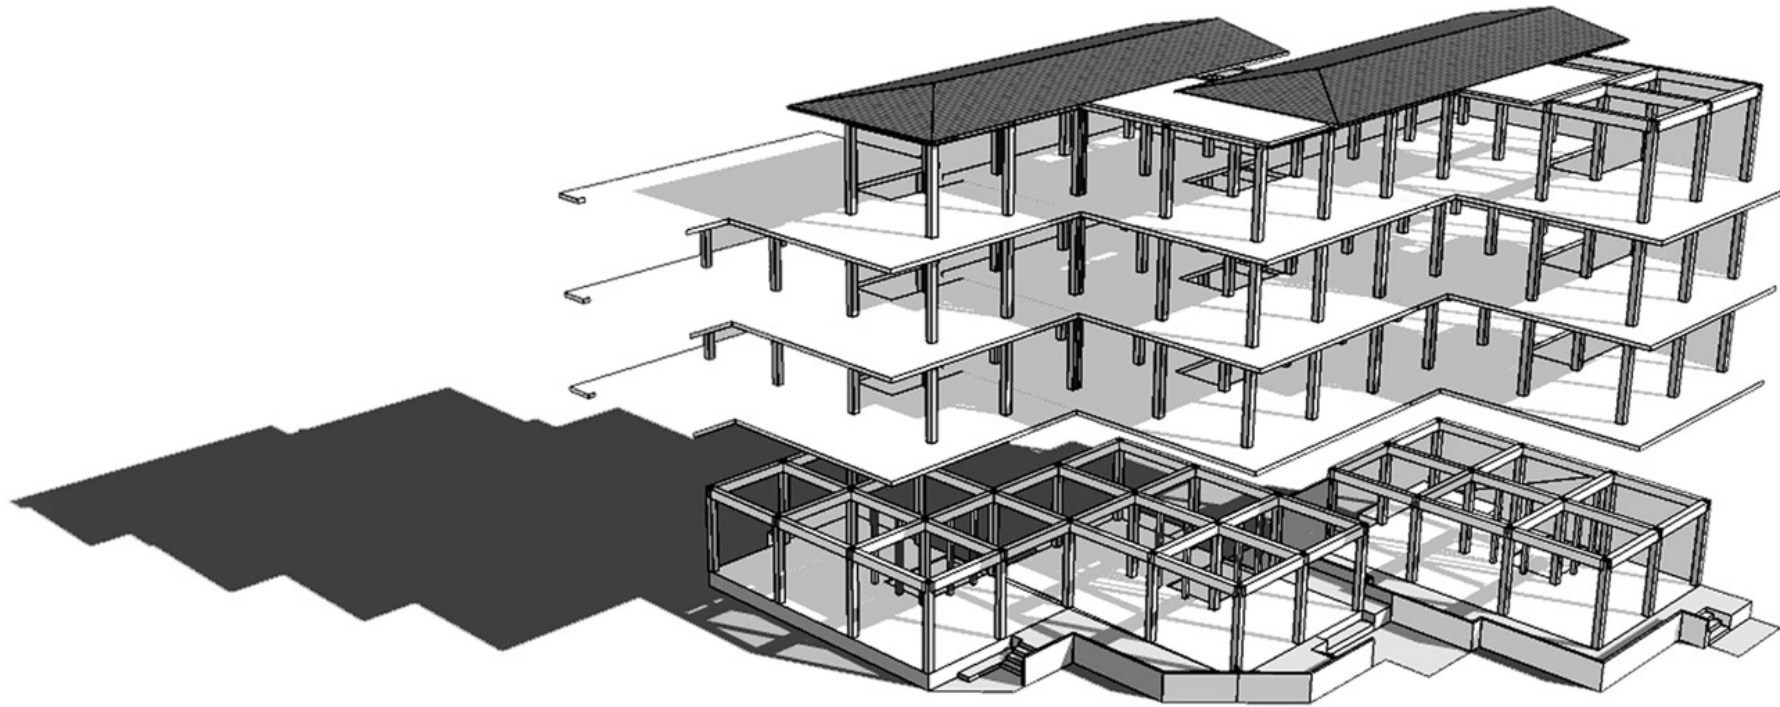

Three typology of affordable house provision
juxtaposed to create better living condition.

Type A - Ground floor unit
Type B - Ground floor unit
Type C - First floor unit

In semi-arid climate of Ahmedabad, courtyards are crucial design element for passive cooling and natural ventilation. Traditionally, every house had a courtyard but with dominant typology emerging from real-estate driven construction has neglected the need and importance of this feature.

DESIGN CONCEPT

To allow greater freedom of choice, each space is an expandable unit. Only structural fabric and service core are kept static, rest of the spaces can be interchangeable as per the need.

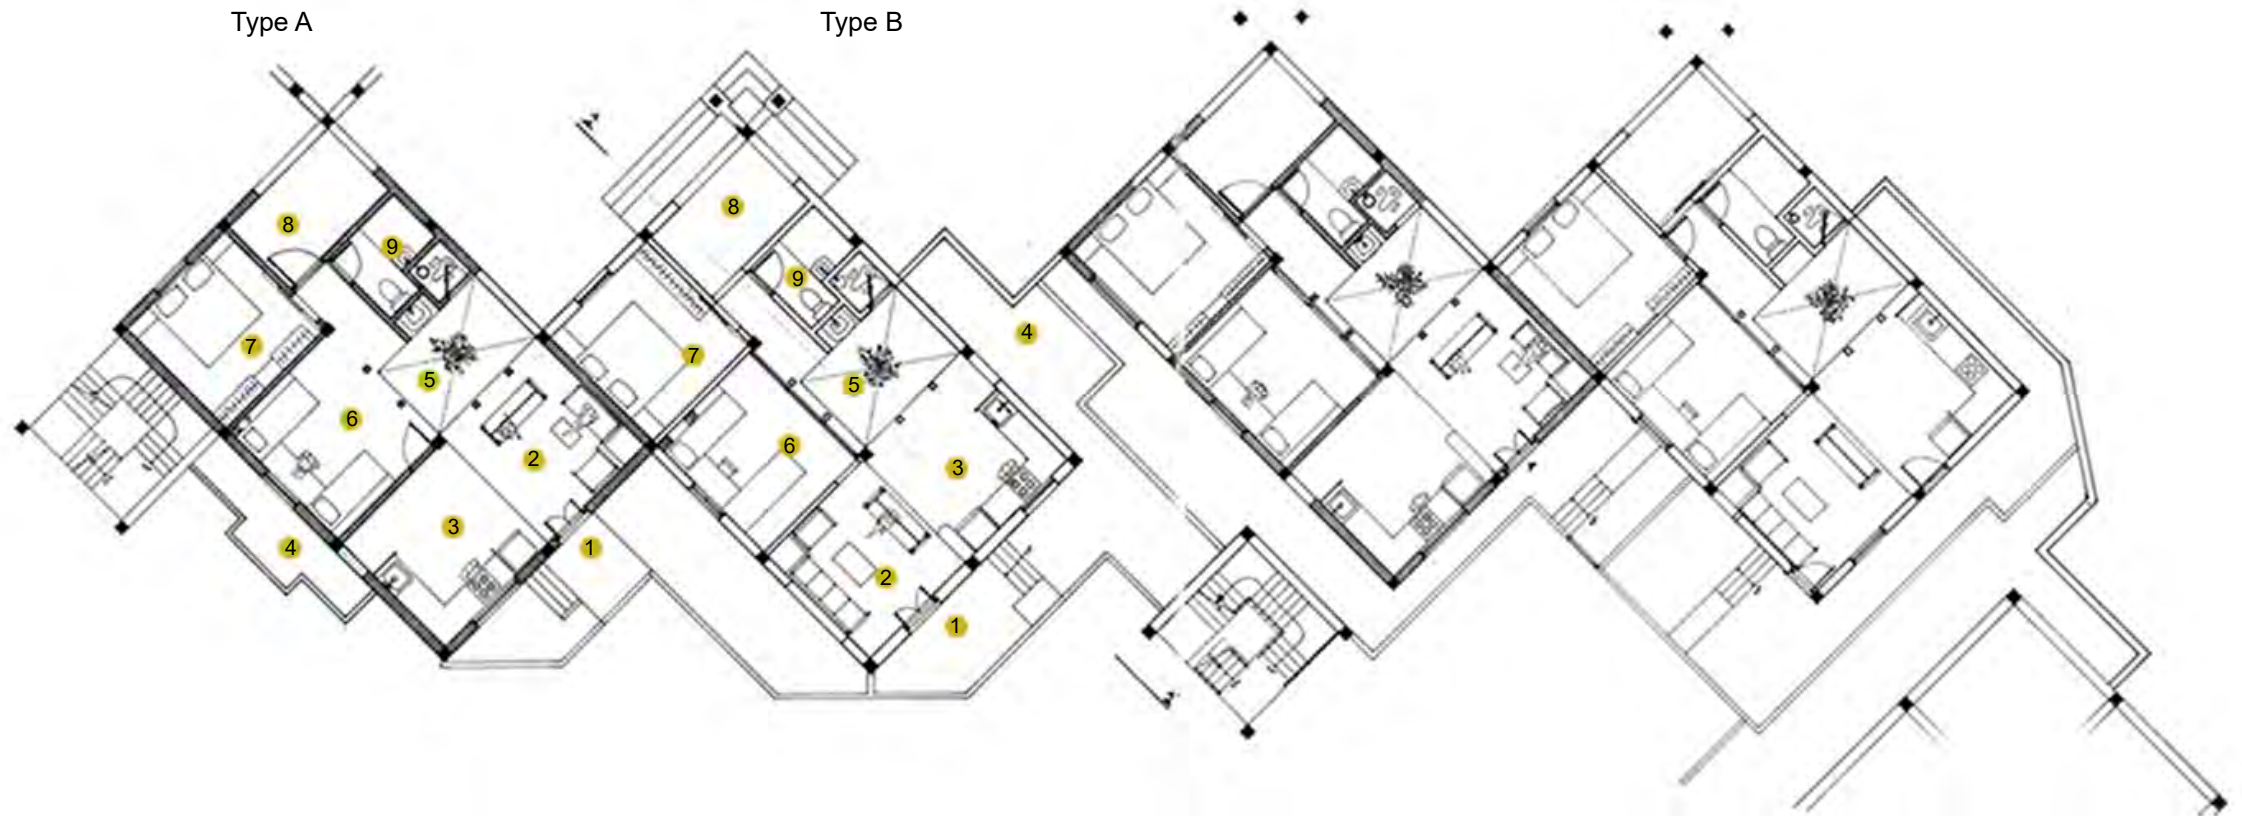

MASTER PLAN

1:200 scale site model

GROUND FLOOR UNITS

- 1. Entrance
